

## Attachment 2

### Department of the Interior Wildland Fire Management Program Home-to-Work Transportation Authorization 2024 Request Record

In accordance with the Department of the Interior Motor Vehicle Management Handbook (March 2020), the following information supports the request for authorization to use a government passenger carrier for home-to-work-transportation:

(1) *Job title and series number.* The designated wildland fire program management positions include Fire Management Officers (GS-0401/456), Assistant Fire Management Officers (GS- 0401/0462/456), Fire Operations Coordinators (GS-0401/456), and Fire Operations Specialists (GS-401/0462/456).

(2) *Duties of the position(s) that require the authorization.* The positions designated may require the use of motor vehicles for the safe and efficient performance of field duties, which can include initial response to wildland fires for establishing command and control and/or providing other leadership and oversight during an emerging incident.

The specific field duties and responsibilities of the Fire Management Officer, Assistant Fire Management Officer, and Fire Operations Coordinator positions include, but are not limited to:

- (a) coordinating and initiating wildland fire management activities based on firefighter and public safety, cost effectiveness, and values to be protected consistent with resource objectives by using the full range of strategic and tactical options as described in an approved Fire Management Plan.
- (b) coordinating operations with cooperating agencies on multi-jurisdictional wildland fires, addressing risk to human safety and the potential for damages to resources.
- (c) managing environmental and workplace hazards of the wildland fire environment and providing leadership and direction to subordinates in the recognition and mitigation of these hazards.
- (d) on-the-job safety and health of all employees supervised.
- (e) serving as initial response incident commander.

The specific field duties of the Fire Operations Specialist position include, but are not limited to:

- (a) assigning missions to ground and aviation wildland fire suppression resources. Making efficient and effective use of multiple types of interagency wildland fire suppression resources with varying capabilities. Ensuring common communications for interagency resources.

- (b) providing protection for life, property, and resources. Selecting strategies and tactics to ensure safe operations for assigned resources. Recognizing potential hazardous situations and providing operational briefings. Initiating contacts with federal, state, Tribal and/or local law enforcement personnel as necessary to close roads, evacuate structures, and deal with the public.
- (c) participating in the development of incident objectives and strategies and tactics, to provide for safe operations and cost-effective incident management.

(3) *The address of the permanent duty station.* The information is provided in the table below.

(4) *Type of passenger carrier.* The information is provided in the table below.

(5) *Justification.* Use of Government passenger carriers for home-to-work transportation by those employee(s) occupying the described positions above will substantially increase the Department of the Interior's efficiency and ability to address wildland fire mission priority work under the following circumstances:

- (a) extreme fire danger and/or high potential for above normal fire growth exists where an immediate response can directly reduce the damage to property and resources as well as limit the complexity of an emerging fire which results in lower threats to public and firefighter safety.
- (b) response to wildland fire emergencies, or other circumstances where there is an immediate, unforeseeable, or temporary need to provide home-to-work transportation for the uninterrupted performance of the Department of Interior's mission, such as during periods of extreme fire danger.
- (c) establishing command and control and/or providing fireline leadership in an emerging incident that results in minimizing exposure to firefighters and the public. The need for competent, qualified oversight on all wildland fires is a key factor in reducing wildfire risk to the public, critical infrastructure, and natural and cultural resources, and meeting Department of the Interior and bureau mission goals.
