

PRISM SAAS

A complete solution to support the automation and paperless requisitions and contract life cycle.

WHAT WE OFFER

PRISM is Unison's flagship module, and it provides an all-inclusive approach to acquisition life cycle management. It is widely recognized as one of the most effective and intuitive contract writing system for federal procurement and acquisitions. It enables users to complete all necessary acquisition tasks efficiently and successfully. The PRISM SaaS solution is a subscription platform that is offered on a fully FedRAMP compliant environment and is interfaced directly and real-time with the with Oracle Federal Financials (OFF) finance modules offered by IBC, allowing for clear line by line accountability and reconciliation of acquisitions and financial data.

KEY FEATURES

PRISM provides managers, policy makers, and program professionals with a secure, efficient, proven approach to complying with the Federal Acquisition Regulation (FAR) and agency specific regulations. It provides the following key features and more:

- FAR/DFARS compliant
- Complete paperless electronic record
- Ability to share data across documents—eliminates duplicate data entry
- Advanced procurement plans
- Acquisition process milestones and Procurement Action Lead Time tracking
- Pre-contract purchase requests and all solicitation types
- Contract writing to comply with complexities of federal contracting, clauses, and terms
- Compliant with all applicable federal security standards

WHY PRISM?

In today's digital age, federal agencies must be capable of conducting acquisitions with clear visibility into the entire end-to-end acquisition processes, as well as having contracting capabilities that comply with federal mandates. In order to meet these requirements, IBC offers the PRISM SaaS solution to support the automation and paperless requisitions and contract life cycle, from planning and requisitioning all the way through contract writing, contract management and contract closeout and archive, using a single user interface. This allows for ease in the auditing process of all categories of government spending and increases transparency, providing clear accountability in compliance with the appropriate federal regulations.

- Interfaces with financial systems, FPDS, FBO, SAM, EDA, and other systems
- Rule-based user access
- Workflow and approvals rules
- Workload management
- Structured maintenance program covering customer care, enhancements, technical support, and regulatory changes

IBC is an OMB-designated federal shared services provider offering financial management services, including accounting, eTravel services, financial systems implementation and support, project management, COR services, contract audit and indirect cost services.
