FEMA

Temporary repairs designed to let a family “shelter-in-place” while permanent repairs are made to their homes.

FEMA

The “surge force” consisted of over 1,100 employees from various DHS agencies.

An innovative cost-saving partnership to strengthen disaster response and expand opportunities for young people.

Housing

City of Neighborhoods

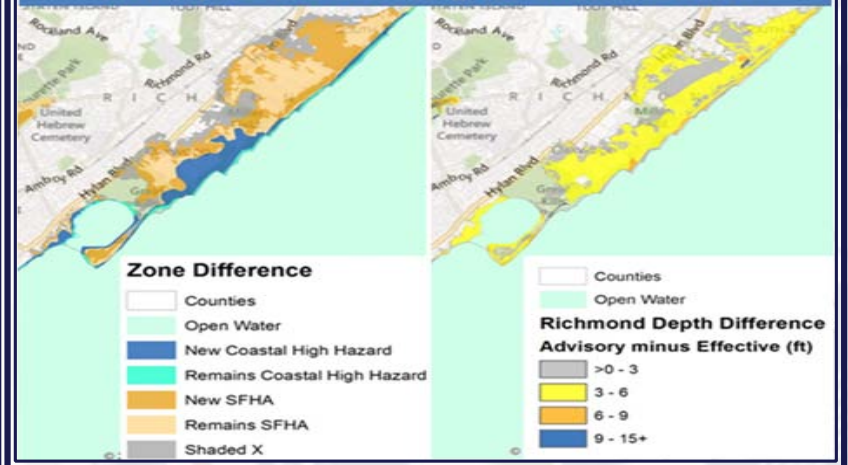

Beach Infrastructure

Redrawing the Flood Map

Example ABFE Changes- Staten Island

- **Beach Infrastructure Task Force was created to solve the emergency and permanent shoreline repairs**
- **The Task Force is bringing together Federal, State, and local level stakeholders.**

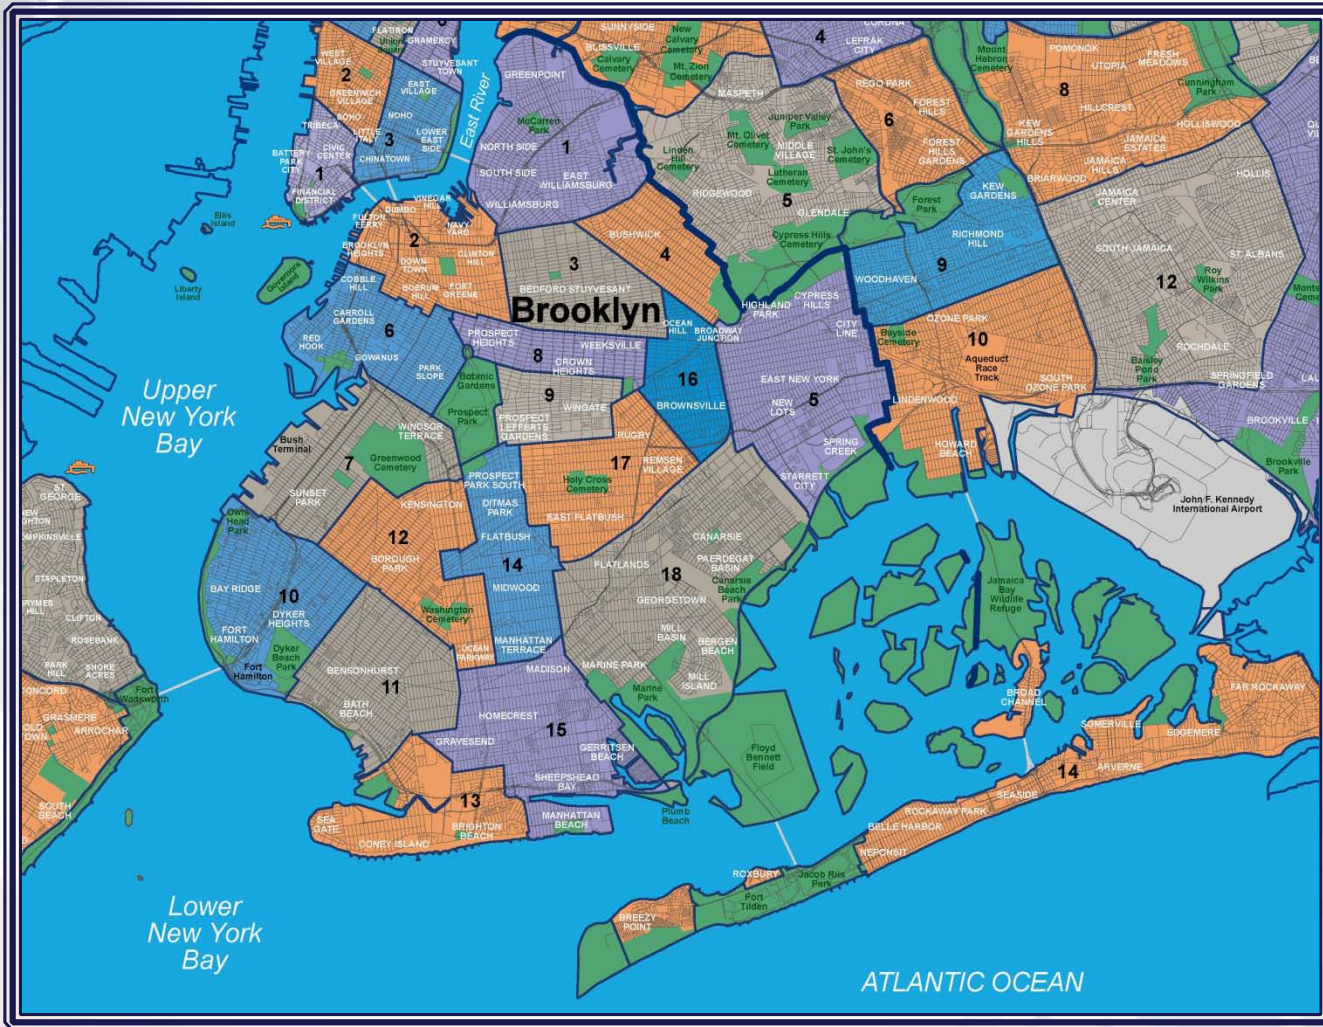

FEMA

- **New York City is a distinctive housing environment that poses unique socio/economic and political challenges.**
- **New York City housing provides a vertical dimension that makes FEMA operations particularly challenging**

FEMA

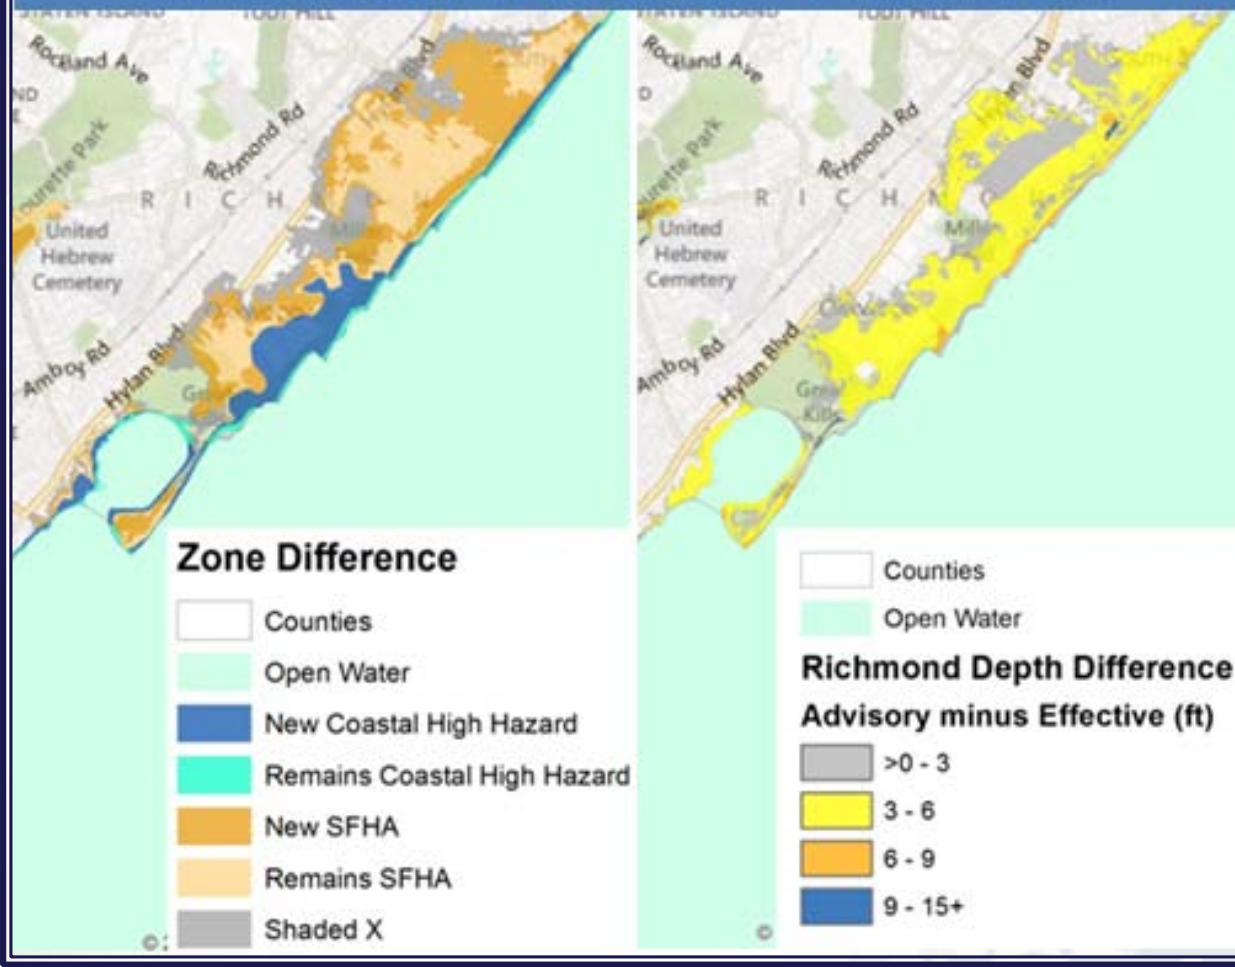

- New York City is a collection of neighborhoods with unique histories and cultures
- Neighborhood Task Force Initiative (NTFI)

FEMA

Example ABFE Changes- Staten Island

- Flood risks have changed and the flood maps adopted by most coastal communities are out of date
- FEMA is engaging with local communities to provide support and guidance

FEMA

COLLABORATION WITH RESULTS

Sandy was an historic storm impacting a large metropolitan area. The result was a new level of collaboration between FEMA, NY State, it's cities, counties and boroughs, to develop unique solutions to complex problems.
