

## Fractionation and Resource Code Statistics Reports

### 1. Fractionation Statistics Report

#### Overview

The fractionation related data and statistics used throughout this document were generated primarily from the Trust Asset and Accounting Management System (TAAMS) as of December 31, 2018. The land areas, data, and approximations in this document are subject to change.

#### Definitions and Explanations

Aggregated and Segregated – It is important to distinguish “aggregated” and “segregated” fractional interest counts. There are many instances where a single individual owns multiple fractional interests in the same tract of land. Such multiple ownership occurs when an individual inherits interests in the same tract of land at different times. For example, an individual may receive an interest in a tract of land when their father passes, and the individual may receive an additional interest in that same tract upon their mother’s passing. This document combines / adds these multiple “segregated” interests and represents them as a single “aggregated” interest. Aggregated interest counts will continue to be used going forward.

Fractionation Statistics Field Descriptions – The table below provides definitions for each field within the Fractionation Statistics Report. “Levels” are used to categorize types of data. Level 1 includes data extracted before the application of policy decisions regarding which tracts and owners may receive offers. The data in the Fractionation Statistics Report is at Level 1. Level 1 data excludes tracts composed of 100 percent life estate interests, interests owned by a tribe(s), interest owned in fee, and interests subject to joint tenancy. Level 2 data is extracted before operating on a reservation and excludes interests that would not receive on offer based on prior policy exclusions. Level 2 data excludes interests held by non-compos mentis; interests held by minors; and interests in probate proceedings.

The data in the Resource Code Statistics Report is at Level 2.

***Fractionation Statistics Report Field Descriptions***

<b>Column</b>		<b>Definition</b>
	Land Area Name	<p>A</p> <p>Federally Recognized Tribe with Jurisdiction. The tribe names in the Fractionation Statistics Report are from a Federal Register Notice dated February 1, 2019.</p> <p>Each tribe typically has a unique tribal code within TAAMS. This number follows the tribe name in parentheses. Due to state borders and other factors, some tribes may have multiple land area codes (LACs). Moreover, in a few instances, the report currently lists multiple tribes for one land area code.</p> <p>LACs with “public domain” or “off reservation” in the land area name are excluded from the report. Locations that are not fractionated are also excluded.</p>
	Land Area Code(s)	B Land area code(s) for the tribe.
Tract, Interest, and Acre Data	100% Tribally Owned	<p>C</p> <p>Number of tracts 100 percent tribally owned.</p> <p>If a tract has a surface interest (S) and separate mineral interest (M), the tract is counted as two separated tracts here.</p>
	100% IIM Owned	<p>D</p> <p>Number of tracts 100 percent individually owned (single Individual Indian Money account holder).</p> <p>If a tract has a surface interest (S) and separate mineral interest (M), the tract is counted as two separated tracts here.</p>
	Fractionated Tracts	<p>E</p> <p>Number of tracts held in trust and/or restricted status that has two or more unique owners (one of which may be the tribe). A “fractionated tract” is a tract with two or more fractional interests, each being less than a 100 percent interest (the sum of the fractional interests equals 100 percent).</p> <p>Columns C, D, and E sum to the total number of tracts held in trust or restricted status.</p>

Column	Definition
Level 1 Fractionated Tracts	<p>F A subset of Column E above, this column <u>excludes</u> the following tracts:</p> <ul style="list-style-type: none"> <li>· tracts owned 100 percent by fee interests</li> <li>· tracts with 100 percent joint tenancy</li> <li>· tracts with 100 percent life estates</li> </ul> <p>The term “interest” is an aggregated fractional interest in a fractionated tract that is held in trust or restricted status (i.e., not a fee interest) where a recognized tribal government exercises jurisdiction, excluding interests owned by a tribe or the government. The criteria for this column are based on title records.</p> <p>This column <u>includes</u> the following fractionated tracts with:</p> <ul style="list-style-type: none"> <li>· interests held by non-compos mentis;</li> <li>· interests held by minors;</li> <li>· interests held by individuals in probate proceedings; and/or</li> <li>· interests held by individuals who are whereabouts unknown (WAU).</li> </ul> <p>For example, if a tract is owned by minors (e.g., two individuals, age 16 and 15, each own 50 percent), the tract would be included in this preliminary count even though by policy, the Program will not purchase such interests. However, if the Program is implemented on the reservation in this example in four years, then these minors will have become adults and may receive offers for their interests at that time.</p>
Acres Associated with Level 1 Fractionated Tracts	<p>G Associated acres for Column F above.</p> <p>The acreage number is the sum of the acres of surface-only, mineral-only, and combined (both surface and sub-surface estate) acreages. For example, if the surface and mineral estates encompassing the same 80-acre tract of land have been severed or split, the acreage count would include them as 160 total acres.</p> <p>Not all of the acres may be eligible for the Program because a portion may be owned by the tribe or by owners that are not eligible to participate in the Program.</p>
Level 1 Fractional Interests	<p>H Number of aggregated title ownership interests within a tract. Excludes:</p> <ul style="list-style-type: none"> <li>· Interests that are owned by a tribe(s)</li> <li>· Interests owned in fee</li> <li>· Interests subject to joint tenancy</li> </ul> <p>Includes:</p> <ul style="list-style-type: none"> <li>· Title interests subject to a life estate that are less than 100 percent of the tract</li> <li>· Interests held by WAU, minors, and non-compos mentis</li> </ul>
<5% Level 1 Interests	<p>I Number of interests with less than 5 percent individual ownership.</p> <p>AIPRA created a “single heir rule” that applies to ownership interests which are less than five percent of the entire undivided ownership of the parcel of land which such interest is a part (See <a href="#">25 U.S.C. § 2206</a>).</p>

Column		Definition		
	Equivalent Acres Associated Only with Level 1 Interests	J	A subset of Column G. This column includes only the acreage associated with Level 1 fractional interests, not the acreage associated with the tract as a whole. This column excludes acreage associated with fee and tribal interests.	
	Tracts with Tribal Ownership	< 50 %	K	Includes the number of Level 1 tracts with less than 50 percent tribal ownership in fractionated tracts.
		≥ 50 % and < 100 %	L	Includes the number of Level 1 tracts with greater than or equal to 50 percent and less than 100 percent tribal ownership in fractionated tracts.
Individuals	Unique Individuals owning Level 1 Fractional Interests	M	<p>Number of distinct owners that own fractional interests for the LAC. This figure includes all types of owners (WAU, minors, etc.) for any land that is not 100 percent owned within the location. This column may include some individual owners that are deceased.</p> <p>This column cannot be summed across land area codes since many individuals own land on more than one land area code.</p> <p>For example, a tract is owned by minors (e.g., two individuals, age 16 and 15, each own 50 percent), the tract would be included in this preliminary count even though it is not technically eligible once the Program develops offers at a particular reservation.</p>	
	Whereabouts Unknown (WAU)	WAU Level 1 Fractional Interest Owners	N	Number of owners who are WAU
		% of Landowners that are WAU	O	Number of owners who are WAU (Column N) divided by Unique Individuals owning Level 1 Fractional Interests (Column M).
	Level 1 Fractional Interest Owners Under Legal Disability	P	Number of individuals holding fractional interests under legal disability (e.g., non-compos mentis or minors).

## 2. Resource Code Statistics Report

Resource Code Statistics Field Descriptions – The table below provides definitions for each field within the Resource Code Statistics Report. “Levels” are used to categorize types of data. Level 1 includes data extracted before the application of policy exclusions (e.g., minors) regarding which tracts and owners may receive offers. Level 1 data excludes tracts composed of 100 percent life estate interests, interests owned by a tribe(s), interest owned in fee, and interests subject to joint tenancy. The data in the Fractionation Statistics Report is at Level 1. Level 2 data is extracted before operating on a reservation and excludes interests that would not receive an offer based on such policy exclusions. Level 2 data excludes interests held by non-compos mentis; interests held by minors; and interests in probate proceedings. The Resource Code Statistics Report data is at Level 2.

### *Resource Code Statistics Field Descriptions*

Column			Definition
	Land Area Name	Q	Federally Recognized Tribe with Jurisdiction. The tribe names in the Resource Code Statistics Report are from a Federal Register Notice dated February 1, 2019.  Each tribe typically has a unique tribal code within TAAMS. This number follows the tribe name in parentheses. Due to state borders and other factors, some tribes may have multiple LACs. Moreover, in a few instances, the report currently lists multiple tribes for one land area code.  LACs with “public domain” or “off reservation” in the land area name are excluded from the report. Locations that are not fractionated are also excluded.
	Land Area Code(s)	R	Land area code(s) for the tribe(s).
Tract Resource	Level 2 Tracts – Surface (S)	S	Number of surface (S) only resource code tracts. This is a subset of Column F in the Fractionation Statistics Report.
	Level 2 Equivalent Acres – Surface (S)	T	Number of equivalent acres associated with Level 2 interests in the tracts in Column S. This is a subset of Column G in the Fractionation Statistics Report. Column T includes only the acreage associated with Level 2 interests, not the acreage associated with the tract as a whole. This column excludes acreage associated with fee and tribal interests.
	Level 2 Tracts – Minerals (M)	U	Number of mineral (M) only resource code tracts. This is a subset of Column F in the Fractionation Statistics Report.
	Level 2 Equivalent Acres – Minerals (M)	V	Number of equivalent acres associated with Level 2 interests in the tracts in Column U. This is a subset of Column G in the Fractionation Statistics Report. Column V includes only the acreage associated with Level 2 interests, not the acreage associated with the tract as a whole. This column excludes acreage associated with fee and tribal interests.

Level 2 Tracts – Both	W	Number of both (B) resource code tracts. This is a subset of Column F in the Fractionation Statistics Report.
Level 2 Equivalent Acres – Both	X	Number of equivalent acres associated with Level 2 interests in the tracts in Column W. This is a subset of Column G in the Fractionation Statistics Report. Column X includes only the acreage associated with Level 2 interests, not the acreage associated with the tract as a whole. This column excludes acreage associated with fee and tribal interests.
Level 2 Tracts – Other	Y	Number of Other resource code tracts. This is a subset of Column F in the Fractionation Statistics Report.
Level 2 Equivalent Acres – Other	Z	Number of equivalent acres associated with Level 2 interests in the tracts in Column Y. This is a subset of Column G in the Fractionation Statistics Report. Column Z includes only the acreage associated with Level 2 interests, not the acreage associated with the tract as a whole. This column excludes acreage associated with fee and tribal interests.
Level 2 Tracts – Total	AA	The sum of Columns S, U, W, and Y.
Level 2 Equivalent Acres - Total	AB	The sum of Columns T, V, X, and Z.
