AMENDMENT TO THE FEDERAL SCHEDULE FOR THE CHITINA SUBDISTRICT OF THE COPPER RIVER

SPECIAL ACTION: FEDERAL SUBSISTENCE BOARD

Under Authority of: 36 CFR 242.10 and .19
50 CFR 100.10 and .19

Special Action No: 11-RS-04-16

Issued at: Copper Center, Alaska, July 13, 2016

Effective Date: 12:01 a.m. Monday, July 18, 2016

Expiration Date: 11:59 p.m. August 31, 2016, unless superseded by subsequent Special Action

EXPLANATION: This Special Action supersedes Special Action No. 11-RS-03-16 and increases the opening for the taking of salmon in the Chitina Subdistrict of the Copper River during the week of July 18 – 24, 2016. The fishery was scheduled to open to Federally qualified subsistence users from 6:00 p.m. on Wednesday, July 20 to 11:59 p.m. on Sunday, July 24. The fishery will now open on Monday, July 18, 2016 at 12:01 a.m. and continue through Sunday, July 24, at 11:59 p.m., a total of 168 hours. This Special Action (11-RS-04-16) also provides the tentative fishing schedule for future fishing periods. These periods are subject to modification by future Special Actions depending on the number of salmon entering the Copper River as estimated by sonar located downstream from the Chitina Subdistrict at Miles Lake.

The State of Alaska (State) also conducts a personal use fishery in this Subdistrict. That fishery is open to all Alaska residents. The State and Federal fishery usually follow identical fishing schedules.

REGULATION: 36 CFR 242.27(e)(11)(ix) and 50 CFR 100.27(e)(11)(ix) are amended to read: The Chitina Subdistrict of the Upper Copper River District will open to the taking of salmon on July 18, 2016 at 12:01 a.m. and remain open for 168 hours, closing on July 24, 2016 at 11:59 p.m.

Additional fishing periods, subject to change by subsequent Special Action, are:

Thursday, July 28, 8:00 a.m.	through Sunday, July 31, 11:59 p.m.	88 hours
Tuesday, August 02, 6:00 p.m.	through Sunday, August 07, 11:59 p.m.	126 hours
Tuesday, August 09, 8:00 a.m.	through Sunday, August 14, 11:59 p.m.	136 hours
Monday, August 15, 12:01 a.m.	continuous as provided by regulation	

Federal Subsistence Board

by delegation to

Eric Veach

Acting Superintendent

Wrangell-St. Elias National Park and Preserve

July 13, 2016

JUSTIFICATION: In December, 2001 the Federal Subsistence Board adopted regulatory proposals establishing a new Federal subsistence fishery in the Chitina Subdistrict of the Copper River. This fishery is open to Federally qualified users having customary and traditional use of salmon in this Subdistrict. Those eligible to participate are residents of Cantwell, Chickaloon, Chisana, Chistochina, Chitina, Copper Center, Dot Lake, Gakona, Gakona Junction, Glennallen, Gulkana, Healy Lake, McCarthy, Kenny Lake, Lower Tonsina, Mentasta Lake, Nabesna, Northway, Slana, Tanacross, Tazlina, Tetlin, Tok, Tonsina and those individuals living along the Tok Cutoff from Tok to Mentasta Pass and along the Nabesna Road.

The State of Alaska (State) also conducts a personal use fishery in this Subdistrict. That fishery is open to all Alaska residents.

Management of both the Federal and State fisheries is based on the numbers of salmon returning to the Copper River. This is known as "abundance based management." A larger than forecast salmon run will allow additional fishing time. A smaller than forecast run will require restrictions to achieve upriver passage and spawning escapement goals.

The fishing schedule described above is based on projected daily sonar estimates at the Miles Lake sonar located downstream from the Chitina Subdistrict at Miles Lake. Adjustments to this schedule are expected as a normal function of an abundance-based management strategy.

During June 27 – July 3, the weekly salmon estimate past the Miles Lake sonar was 92,337. The preseason projection for this period was 43,795 salmon, which results in a surplus of 48,542 salmon. Copper River sockeye salmon migratory timing and the previous five-year average harvest and participation rates indicate sufficient numbers of salmon available to justify an increase of 66 hours above the preseason schedule to 168 hours of fishing time during the week of July 18 – July 20.
